

Letter of Recommendation for Ms. Mobley

Ms. Mobley is one of the most special teachers that I have had since I have been going to school. I was very happy when she asked if I would write a letter about her because I believe that when I am 80 years old I will always remember Ms. Mobley as a person who made a big difference in my life.

At our school, Springdale Park Elementary (SPARK), we are lucky to have a very interesting Science program that focuses on nature, the environment and important aspects of how we interact with our surroundings. Ms. Mobley is our teacher and each week I look forward to the lessons that she shares with us. We learn about everything from the life cycle to geology to healthy eating habits.

Unlike most of our classes, Ms. Mobley brings the outside world into our classroom. She has special speakers, such as one man that talked recycling challenges into our city. From that point forward my sister and I check every piece of trash and review the number on the bottom to determine if it can be recycled. We also have a garden at home, thanks to Ms. Mobley.

Ms. Mobley has a special way of making regular class lessons fun, interesting and memorable. Two years ago we spent some time learning about the importance of composting. Ms. Mobley had us use all five senses to fully understand the different types and different purposes. The best part is that I could go home and share with my parents that "I played with POOP today!" but after learning with Ms. Mobley that day, I will forever remember everything about composting.

SPARK also now has a new bee hive on top of the school, near the garden. We like to call Ms. Mobley our "Queen Bee." Ms. Mobley has a unit on pollinators so our 7,000 new friends will part of our future lessons and we will soon have our very own honey soon.

This year I have also been on the Green Team, which Ms. Mobley leads. The Green Team meets twice a week and touches so many parts of the school. We publish a school Green Team Newspaper that all kids can share. Each person on the green team writes one of the articles and we also find entertaining cartoons, statistics and quotes so that the kids enjoy reading it as well. Ms. Mobley also helped me write a grant for the school to have the Audubon Society of Atlanta come to teach our Kindergardeners about local birds and I won the grant and received \$437 to have them come this spring! She is always so helpful.

Thank you for considering Ms. Mobley for this honor. I love her and I know you will too.
